Signin Button

{{ url_for (form) }}

@ app.route ('form.html')

render_template ('sign formpage.html')

Form Filled

we are having name Email +
Password

Python Code runs
Line by
Line   @app.route ('process')

Start your Code here

email = request.form ['email'] → ①

password = request.form ['password'] — ②

return _____

this all should be in fn.
ie in route

@app.route ('Process')
    ① ①
    ② ②

return → render →
